VERIFICATION REPORTS: WORKFLOW

START HERE
Authors intend to submit a *Verification Report*. Do all authors meet the eligibility criteria?

→ **No / Not sure** → A full submission may not be possible but authors are welcome to submit a presubmission enquiry for confirmation: https://openpsychologydata.metajnl.com/contact/

Yes ↓

Are the submitting authors already in possession of all required data and code?

→ **No** → Do the submitting authors wish to gain Stage 1 in-principle acceptance of their proposal *before* or *after* conducting their (re)analyses?

→ **Before** → Authors should contact the data custodian to request permission to access the required data/code, but should make clear that they do not wish to *receive* the data until and unless their Stage 1 manuscript is accepted in principle at JOPD. Was the request approved by the data custodian?

Yes ↓ (from "Are the submitting authors already in possession...")

Do the submitting authors have legal and ethical permission to conduct and publicly report their proposed (re)analyses of the original data?

→ **No** → Authors should contact the data custodian, to request permission to access and/or reuse the required data. Was the request approved by the data custodian?

After ↓ (from "Do the submitting authors wish to gain Stage 1... before or after")

Yes ↓ (from "Do the submitting authors have legal and ethical permission")

Yes → (from "Authors should contact the data custodian, to request permission to access and/or reuse")

Do the submitting authors wish to gain Stage 1 in-principle acceptance of their proposal *before* or *after* conducting their (re)analyses?

No ↓ (from "Authors should contact the data custodian, to request permission to access and/or reuse")

No ↘ (from the "Before" box, custodian)

This is not suitable for a Verification Report but maybe suitable for a Verification Note with other journals.

Yes ↓ (from the "Before" box, custodian approved)

After ↓

Authors should conduct the (re)analyses and then submit a Stage 1 manuscript with the results redacted. ==The cover letter should state that the results are redacted but already known to the submitting authors.==

Before ↘

Authors should submit a Stage 1 manuscript outlining the proposed (re)analyses. The cover letter should confirm either that the data custodian has given permission for the authors to access and (re)analyse the data, or that the authors are already in possession of the data (whichever is applicable), but in either case that the proposed analyses have not yet been undertaken.

STAGE 1 REVIEW CRITERIA

#1. Value of verification attempt

#2. Methodological validity of verification attempt

Manuscript undergoes Stage 1 review. Are all Stage 1 criteria met?

→ **No** → Reject or Revise

Yes ↓

Stage 1 in principle acceptance awarded

↓

The submitting authors formally register their accepted Stage 1 manuscript on the OSF Registry: https://osf.io/rr/

↓

If applicable, the submitting authors now receive the data from the data custodian and perform the approved (re)analyses

↓

STAGE 2 REVIEW CRITERIA

#1. Adherence to protocol

#2. Whether the conclusions are justified given the evidence

Completed manuscript with updated Abstract, Results and Discussion submitted for Stage 2 Review. Are all Stage 2 criteria met?

→ **No** → Reject or Revise

Yes ↓

Stage 2 Final Acceptance
